

WHAT YOU NEED TO KNOW ABOUT **Lock Out**

A lock out is a method of **PROTECTION** when working on or repairing any equipment or machinery.

This procedure **PREVENTS** electrocution and **INJURIES** that occur through machinery malfunction.

REMEMBER

DE-ENERGIZE all energy sources to **ACHIEVE ZERO ENERGY** before you perform repairs, maintenance, cleaning, altering, oiling or when power is restored after an outage.

Contact your workplace health and safety committee, steward, Union Rep or the Union's Health & Safety Department for more information.
